PROFILE

PhD Candidate in Photovoltaic and Renewable Energy Engineering at UNSW Sydney, specialising in residential rooftop solar PV adoption, tariff design, and energy policy in emerging economies. My research examines household adoption pathways, evaluates alternative tariff and policy mechanisms, and assesses equity and utility-side implications to support Thailand's renewable energy transition.

EDUCATION

PhD in Photovoltaic & Renewable Energy Engineering UNSW Sydney Feb 2025 – Present
(Second-year candidate)

- Residential rooftop PV adoption pathways in Thailand
- Tariff design and distributed energy resource (DER) policy mechanisms
- Equity implications of energy transition policies
- Utility and distribution network operational impacts

Finance, Technology and Policy (MSc), University of Edinburgh Sep 2023 – Aug 2024

- Degree with Merit

Industrial Engineering (BEng 1st Class Honors), Chiang Mai University Aug 2018 – Mar 2022

- GPA of 3.86/4.00 (1st Class Honours)
- Ranking 1st among 116 graduates in the major field.

WORK EXPERIENCE

Faculty of Engineering, Chiang Mai University Dec 2022 – Present

Position: Assistant Lecturer

- **Project: The Master Plan for the Northern Special Economic Corridor in Thailand, with a focus on the bio, circular, and green (BCG) economy**

Conducted demand and supply analysis, scenario planning and writing, and performed gap analysis.

**Supply Chain Engineering Management Research Unit,
Chiang Mai University**

Apr 2022 – Dec 2022

Position: Research Engineer

- **Project: Leonardite business feasibilities study with Electricity Generating Authority of Thailand (EGAT)**

Managed logistics and supply chain, analysed demand, assessed marketing gaps, and handled resource management and cost analysis for budgeting.

- **Project: Talent Mobility Project with Science and Technology Park Chiang Mai University (STEP)**

Executed planning and forecasting, mastered production scheduling, managed capacity and materials, oversaw inventory management, and conducted cost analysis along with budgeting. Additionally, performed motion and time study.

**Department of Strategy Management and Quality Control
CP ALL PCL**

May 2021– Oct 2021

Position: Intern in CP ALL COOP Program

- **Project: Developing the PDCA system implementation for CAF-M**
- **Project: Strategy Map and Blueprint for CAF-M**

PUBLICATION

Kasemset, C., Fongsamootr, P., & Opassuwan, T. (2024). Cultivating efficiency in human resource management: The integration of Lean concept and IT solutions for operational enhancement. *Engineering and Applied Science Research*, 51(4), 442–451.

ACHIEVEMENTS & AWARDS

Chang Phueak Scholarship from Chiang Mai University **2023 - Present**

- Full Scholarship for a Master's and Doctoral Degree

Global Technology and Business Management Conference (GTBMC) **2022**

- Topic | Operations Improvement in Human Resource Management using Lean Concept
- Best Innovative Technology Paper Award

The 26th Tri-University International Joint Seminar & Symposium **2019**

- At Jiangsu, China
- Topic | Development of Disability-inclusive Disaster Risk Reduction in Chiang Mai University
- Best Presentation Award and Founder Award

The Professor Dr TABNILANIDHI Foundation

- Excellent in Science Learning Award :1st year university level
- Certificated and Honor Pin

Intelligence Scholarship from Chiang Mai University **2018 - 2022**

- 4 years
- 320,000 THB

ADDITIONAL SKILLS

IT SKILLS

Python Programming, Financial Machine Learning

SUPERVISOR

Anna Bruce, PhD.

Associate Professor

School of Photovoltaic and Renewable Energy Engineering
